Financial Analyst with 3+ years of experience servicing buy-side client accounts, providing onboarding and product support, and analytics reporting across the full investment lifecycle. Experienced in handling complex queries and serving as an SME in trade activity, compliance, fund accounting, P&L, and risk. Proven track record in OMS and PMS automation, improving workflows, and training junior analysts across client support processes. Fluent in building strong client and vendor relationships, communicating with internal and external stakeholders, and conducting research and documentation.

Professional Experience

AI Engineer | MSA Professional Services

Sep 2025 - Dec 2025

- Developed agent-run ETL pipelines in Microsoft Fabric to automate enterprise data processing and reporting, saving months of manual effort.
- Integrated Copilot Studio agents over SQL warehouses so business teams could query big data in natural language.

Senior Financial Analyst | Enfusion

Jul 2021 - Jul 2024

- Supported clientele growth across 15+ deals by providing tailored product onboarding and training to new funds, in collaboration with sales.
- Elevated client relationships and minimized churn by providing frictionless query resolution across multi-asset investment accounting, P&L attribution, exposure analysis, and financial reporting.
- Cut average client-query resolution time by 30 minutes by analyzing and optimizing Zendesk support queues and JIRA workflows.
- Improved downstream performance reporting by automating trade, position, and cash reconciliations, while ensuring swift T+1 settlement.
- Reduced regulatory risk by automating post-trade reporting in collaboration with Compliance teams, flagging compliance breaches in real time.
- Reduced pricing risk by owning Bloomberg and Refinitiv breaks end-to-end, resolving discrepancies in collaboration with market data teams.
- Trained juniors in issue triage and provided work oversight, enforcing strict documentation standards and knowledge sharing for quality assurance.

Market Data Analyst | Ecovia

Nov 2020 - May 2021

- Supported raising seed funding for a reusable packaging startup by shaping growth strategies through deep market and competitor analyses.
- Grew social media following by 2,500+ through insight-driven digital campaigns focused on advocating sustainable consumption.
- Improved segmentation and targeting by forecasting sales using A/B tested consumer patterns in Python.

Market Research Intern | Reliance Jio Creative Labs

Nov 2019 - Sep 2020

- Drove 18-22% higher engagement by analyzing consumer data and informing campaign strategy for global brands like Reliance and Coca-Cola.
- Optimized campaign rollouts through agile marketing, using Python for sentiment analysis and Power BI for leadership reporting.

Projects

- Capstone Project in Agentic AI at UW-Madison:** Transformed the statistical analysis for a steel parts manufacturing process into an AI decision-support tool, reducing decision turnaround from 2.5 hours to 20 minutes. Deployed an Azure AI solution against strict evaluation metrics, using tool calling (MCP) to standardize analysis and RAG to enforce governance, with human-in-the-loop oversight.
- FIFA WC 2026 Bracket Analyst:** Improved decision-making on filling the FIFA World Cup bracket by building and shipping a full-stack app where a guarded Claude agent autofills your bracket, backed by a reliable odds engine that predicted all 4 semifinalists, both finalists, and the champion.
- Pocket Scout - Fantasy Premier League Agent:** Improved decision-making on Fantasy Premier League transfers by building an agentic app that reasons with Claude and calls a deterministic player-scoring tool via a knowledge-grounded RAG pipeline to provide customized advice. Applied robust prompt-injection guardrails and an extensive backtesting suite covering a decade of historical data, all shipped via Docker.

Education

MS - Information | University of Wisconsin-Madison

Sep 2024 - May 2026

MBA - Finance | NMIMS University

Jul 2019 - May 2021

Bachelor's - Information Technology | NMIMS University

Jul 2016 - May 2021

Skills

- Finance:** Front-Middle-Back office liaison; New account setup; Trade allocation and commissions setup; Working knowledge of Equities, Fixed income, Futures, Options, FX, Swaps, Alternatives; Working knowledge of GL, Tax Lots, Corporate actions, Financial statements, Amortization;
- AI & ML:** Forward Deployed, Loop Engineering, Claude, Gemini, Azure AI, AWS Bedrock, Copilot Studio, Prompt Engineering, RAG, LLMs, REST API, Fast API, Cohere, Pinecone, Weaviate, Milvus, NumPy, Scikit-Learn, TensorFlow, PyTorch, Predictive Modeling, Statistical Analysis
- Data Engineering & Cloud Platforms:** SQL, NoSQL, MongoDB, Fabric, Snowflake, Databricks, GCP, Kubernetes
- Data Analysis & BI:** Microsoft Office, Advanced Excel, Macros, Tableau, Power BI, Pandas, Looker, Matplotlib, Seaborn, Plotly, R, MATLAB
- Languages:** C, C++, Python, Java, JavaScript, GoLang
